

The World's Largest Golf Netting Installation

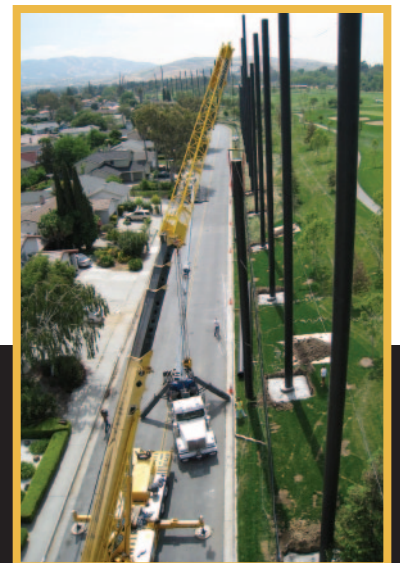

The World's Largest Golf Netting Project, Coastal Steel Poles ranging in height from 60 to 140 feet was engineered and manufactured by Coastal Netting Systems for Los Lagos Golf Course in San Jose, California – Judge Netting was the installation contractor.

Driving Range Netting Systems–

For both driving ranges and fairways on a golf course, Coastal will engineer a system specifically tailored for your needs. We specialize in design and construction of netting systems for all dimensions of the industry, from a basic driving range in a country setting to a complex urban system with high exposure. **Call for a no-obligation free quote and allow us to put our industry expertise to use for you.**

The Undisputed Industry Leader–

- Over 750 Steel Pole installations throughout North America without a structural failure
- Builder of the highest netting system in North America – 170 feet tall
- Conservative structural engineering design combined with high quality steel fabricated by certified welders assures clients of superior steel poles
- Engineered for specific soil conditions and wind load calculations
- Netting systems designed for minimal amount of cables
- Plans and professional structural engineering seals are available for each project
